

NGUYỄN ĐĂNG VIỆT

Full-stack Developer Intern | vietnguyen.1022005@gmail.com | 0905507622

SUMMARY

Full-stack Developer with experience in React, Next.js, Node.js, Express.js, PostgreSQL, and MongoDB, building responsive web applications and integrating RESTful APIs.

EDUCATION

University of Technology and Education(UTE)

Sep 2023 – Present

GPA: 3.92/4.0

ScholarShip: 5 consecutive semesters (2023 - present)

WORK EXPERIENCE

Freelance FullStack Developer

Oct 2025 – Present

Developed responsive features with React and integrated RESTful APIs using Express.js. Implemented features based on project requirements, debugged and fixed software defects, and performed API testing with Postman. Collaborated with teammates using Git in an Agile workflow.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript (ES6+)
- **Frontend:** React, Next.js, HTML5/CSS3, Tailwind CSS
- **Backend:** Node.js, Express.js
- **Databases:** PostgreSQL, MongoDB
- **Tools:** Git, Docker, Postman

PROJECTS

ITJOB – IT Recruitment & Social Q&A Platform

Nov 2025 – Feb 2026

FullStack Developer - Demo: [it-job-ndv.vercel.app](#)

- Built responsive web pages based on modern UI principles using Next.js and Tailwind CSS, **achieving sub-1.5s** Initial Page Load across devices.
- Integrated responsive frontend interfaces with RESTful APIs across **15+ endpoints** for authentication, recruitment, and community features.
- Implemented **20+ reusable UI** components (job cards, modals, input forms) to improve maintainability and development efficiency.
- Developed secure authentication using JWT, OAuth 2.0, and RBAC supporting multi-role permissions (Admin, Recruiter, Candidate).
- Integrated Cloudinary for media uploads and enforced API rate limiting (**capped at 5 auth attempts/15 mins**) to improve security and reliability.
- Optimized application performance through server-side pagination (**10 rows/page**) and Promise.all batch DB queries, keeping API latency under **200ms**.

SMARTPOS – Multi-Branch Sales Management System (TeamSize:3)

Jan 2026 – Feb 2026

Backend Developer – Demo: [smartpos-ndv.vercel.app](#) (username: admin, pass: Admin123)

- Developed backend APIs for multi-branch retail management, optimizing Excel import to process **2,000+ product rows** in **<2s** and indexing barcode searches for scan to deliver results in **<50ms**.
- Implemented inventory synchronization using Mongoose atomic updates and automatic stock rollback, preventing overselling and guaranteeing **100% data consistency** upon payment cancellations.
- Integrated PayOS payment gateway with secure HMAC webhook verification and Socket.IO, pushing branch-isolated real-time payment alerts in **<1s**.
- Engineered custom RBAC middleware for multi-branch data isolation and collaborated in a 3-member Agile team using Git feature-branch workflow.
