

SUMMARY

Aspiring Full Stack Developer and IT student dedicated to building efficient, scalable web applications. Eager to leverage strong front-end and back-end fundamentals to contribute to a professional team and grow through real-world challenges.

EDUCATION

University of Technology and Education
GPA: 3.9/4.0
ScholarShip: 5 consecutive semesters
(2023 - present)

WORK EXPERIENCES

Freelance Web Developer

10/2025 – Present

- Developed and delivered end-to-end outsourced web projects for various external clients.
- Built custom web applications from initial requirements to final deployment.
- Managed full project lifecycles, ensuring high performance and client satisfaction.

SKILLS

- **Front-End Technologies:** JavaScript (ES6+), TypeScript, HTML5, CSS3, React, Next.js, Tailwind CSS, Material-UI (MUI).
- **Back-End Development:** Node.js, Express.js, NestJS, RESTful API Design.
- **Databases & Storage:** PostgreSQL, MongoDB, Database Schema Design.
- **Architectures & Security:** RBAC (Role-Based Access Control), JWT/Session Authentication.
- **Developer Tools:** Git, GitHub, Vercel, Postman, Docker.

PROJECTS

IT-JOB - website for recruiting IT jobs

26/11/2025 - 7/2/2026

- Github: github.com/NguyenDangViet2005/it-job-ndv
github.com/NguyenDangViet2005/it-job-ndv-express
- Demo: it-job-ndv.vercel.app
- Description: Developed a dedicated job board for the IT industry, connecting developers with top companies through a streamlined, user-friendly interface and optimized application workflow.
- Technologies: **Next.js, Tailwindcss, Express.js, PostgreSQL**
- Features: Smart job search & one-click applications, integrated developer Q&A community, personal profile management, and fully responsive UI.

SmartPOS - sales management system

6/1/2026 - 29/1/2026

- Github: github.com/NguyenDangViet2005/smartPOS
- Demo: smartpos-ndv.vercel.app
- Description: A comprehensive, cloud-based point-of-sale platform designed to streamline retail operations for SMEs. The system provides an end-to-end solution for seamless sales tracking, payments, and automated inventory management.
- Account Demo: username: admin, password: Admin123
- Technologies: **Next.js, Tailwindcss, Express.js, MongoDB, Socket.io**
- Features: Engineered an all-in-one POS platform integrating secure RBAC authentication, real-time dashboard analytics via WebSockets, omnichannel transaction processing, and multi-branch inventory control with automated stock deduction and bulk Excel/CSV capabilities.

Trello(clone) - website to manage tasks in team

10/6/2025 - 22/7/2025

- Github: github.com/NguyenDangViet2005/trello-web
github.com/NguyenDangViet2005/api-trello
- Demo: trello-web-ndv.vercel.app
- Description: A board UI allowing users to reorder columns and move tasks between lists.
- Technologies: **React, MUI, Express.js, MongoDB, Dnd Kit**
- Features: Seamless Trello-style drag-and-drop system for reordering columns and moving cards across lists with fluid animations.
